### Obituary

Mrs. L. E. Stout died in the Holy Cross hospital, Calgary, on Monday, October 7th, following an operation. Deceased had lived with her family some six miles south of Lomond, and this year, as had been her custom for some years past began to operate J. Doyle's cook car in the Champion district during threshing. She was taken ill there and removed to the Calgary hospital where she died.

The deceased, who was in her 42nd year resided in the Champion district for ten years, moving two years ago to the Lomond district. She leaves to mourn her loss her husband, one son, L. V. Stout, living at home, and one daughter, Mrs. Harry Hammer living on an adjoining farm. In addition a twin brother, D. R. Pitts, a sister, Mrs. Lena Acres both of Seattle, and a brother, Eugene Pitts, of Johnson City, Tenn., also survive.

While Mrs. Stout had only been in the hospital for six weeks she had been ailing for the past two years and her demise was totally unexpected. The meeting have the sincere sympathy of the community.

**Rev. M. G. Garabedian, B. A., to Preach Here.**

On Sunday Oct. 13th, the Rev. M. G. Garabedian of Carmanagay, will preach in the interests of the missionary and maintenance work of the United church. At Sanderson school at 3 p.m. and Champion at 7.30.

Mr. Garabedian came to Carmanagay three months ago from Hamilton, Ont. having previously many years experience in the Canadian west. He will bring an interesting message. Rev. S. R. Hunt will supply the Carmanagay work for the day.

The annual meeting of Masonic District No. 11, which will be held in the Community Hall on Tuesday, October 15th, will consist of two sessions one at 2.30 in the afternoon and the second at 7.30 in the evening. A banquet will be served by the O.E.S. at six o'clock. It is urgently requested that all Masons in the District attend.

The Ladies' Aid will hold their annual bazaar in the Community Hall on Saturday, November 16th. Tea will be served during the afternoon and supper from 6 to 6 o'clock. This event has always aroused decided interest in the community and will undoubtedly retain its popularity again this year. Remember the date—Nov. 16.

The quiet wedding of Miss Cleotha Wilcox, daughter of Mrs. Allie McCoy, to Mr. Willis Smith of Champion is one of much interest here. The happy couple are making their home in Barnwell and have the best wishes of the whole community. The bride is one of Barnwell's most popular young ladies, and after being away this summer she is doubly welcome back again.—Lethbridge Herald.

Mrs. James Walker of Carmanagay entertained a number of her Champion friends on Thursday evening. Mrs. J. Collins won the prize for whist.

Harry Smith is making two trips per week to Calgary with a truck load of hogs. He makes the round trip in the one day.

Mr. and Mrs. R. M. Long of Calgary were visitors with Mr. and Mrs. J. Long at the farm, recently.

### Reid Hill Community Hall Holds Dance Oct. 25th

The second annual supper and concert given by the Reid Hill Community Hall Association is announced for Friday evening, October 25th. It is needless to state that the supper will be the very best in every possible way, and the program in preparation exceeds any previous effort made in this direction. A dance will follow for which the Len Davis orchestra will supply the music, the popularity of this musical organization with the dancing element being outstanding all over this part of the country. A big crowd is anticipated and preparations for their entertainment are complete. The Reid Hill community hall has been a complete success and residents in that vicinity are naturally proud of the achievement in building it and having it almost free of debt. No doubt all the neighboring communities will turn in force on Oct. 25th and join in making the second annual supper, concert and dance an outstanding success.

### Women's Institute Meeting

The October meeting of the Champion W. I. was held at the home of Mrs. Hoskins. An interesting program was given consisting of a short address by Miss Wilson, two charming songs by Mrs. McLean accompanied by Miss Wilson. A report to the effect that hall and orchestra are engaged for the dance Oct. 28. A report on the many donations already received for the Cedar Hope Chest and Mrs. J. N. Beaulieu's report on Legislation. This was such a lucid outline of the work this session that some of the M.L.A.'s ought to borrow it to quote.

After this was a violin solo by little Helen Higgins "Military March" with Viola Valse for an encore. She was assisted at the piano by Miss Rheia.

It was decided to have a Xmas party to entertain the husbands of the members. So if any of the men of the locality want to have an awfully good time for once in their lives they ought to see that their wives paid up members of the Champion W. I. Mrs. F. C. Alcock and Mrs. W. Ulrich are arranging it "Verbum Sap". Mrs. Hoskins and Mrs. Hunt served delectable sandwiches tea and cakes.

Elks dance Oct. 16.

Mrs. Blusson left for California last Friday, where she will spend the winter with her sisters who reside there.

Mr. and Mrs. Fred Hagerman and Mrs. R. A. Clements attended the W.C.T.U. banquet held in St. Paul's United Church last week.

U. S. Alexander is confined to his house with an infected foot. As a consequence the council meeting arranged for Thursday was adjourned.

Delbert and Franklin Coel are spending the winter at Chicago and reached there in time to take in the world series.

Dr. Freeze is operating on a number of cases for tonsils and adenoids at Mrs. S. C. Milliken's Nursing Home on Saturday and again the following Wednesday or Saturday.

It is reported the Alberta Road Commissioner was in town recently and stated the new road would run through town on the old main road to Vulcan.

# ANNOUNCING 1930 NASH "400"

WORTHY SUCCESSOR TO A GREAT SUCCESS

TWIN-IGNITION EIGHT

TWIN-IGNITION SIX

SINGLE SIX

Introducing a completely new group of motor cars with the richest new body designs that ever delighted the eyes of the motoring world, and with impressive new engineering of the most advanced character. ¶ When you view the 1930 Nash "400" models on display you will instantly recognize the fact that Nash today is decisively ahead of the entire industry.

Geo. L. Depue, Dealer, Champion.

## Local and General

The Ford Garage is building a new work shop on their premises.

Found—Key with chain attached. Kell make. Owner apply at Chronicle office.

Jos. Hicks, barrister, of Barons, will be at L. J. Adams' office every Tuesday and Friday where he may be consulted.

Henry Leback has purchased a half section lying northeast of town from Joe Kesel. The price is said to have been a good one.

K. R. McLean R. O., of Anderson & McLean, Sight Specialists, 208 8th Ave. West, Calgary, will make his monthly visit to Champion Friday, October 25, at the Drug Store.

B. Hummel has installed a cutting torch along with other new equipment. Those desiring work which would require this torch may now bring it along with confidence.

A car of wheat shipped for V. S. McClure by F. Clever of the Home elevator graded No. 1, with no dockage at the terminal elevator. This is a rare occurrence in the dockage line according to all accounts.

Substantial progress has been made in the Hope chest contest in charge of Mrs. Harry Smith for the Women's Institute. Both chest and contents promise to exceed any preconceived ideas as to their beauty and value.

Sletto Bros. (Tom and Martin) who have farmed nine quarters of their own during the past year, raising some 10,000 bushels of wheat, have rented three-quarter sections from D. D. Sommers and will farm the entire twelve quarters next year. The farms are surely growing in size in this vicinity, the day of small operators evidently being nearly past.

The Elks propose to make the opening dance of the season advertised for Wed. evening, October 10th the big event in this line that may be expected for some time. Len Davis and his orchestra will furnish the music, and the committees in charge intend to have every other feature fully up to the music. Everyone should reserve this date for the Elks dance.

## Larkins—Brewster

A wedding in which Edmund Patrick Larkins of Champion and Miss Rose Alberta Brewster of Barons were the principals took place at Barons on Thursday, October 3rd, at two o'clock in the afternoon, Rev. Gray being the officiating clergyman, and Mr. and Mrs. Lloyd Lyons standing up with the contracting parties. A dainty dinner was served by the bride's sister, after which the happy couple left for the groom's home at Champion where they will reside.

The Chronicle reaches almost every home in the district. You may always rely on your advertisements reaching the proper place.

# World's Grain Exhibition To Be Outstanding Event In The History Of Canada

The World's Grain Exhibition and conference to be held in Regina in 1932 promises to be the greatest international event ever staged in the Dominion of Canada. Invitations are now being given world-wide distribution, and it is anticipated between fifty and sixty countries will be represented.

The year 1932 also marks the fiftieth anniversary of the settling of that part of the prairie which now constitutes Saskatchewan, which makes it a fitting time to hold such a world-wide event.

The Federal Minister of Agriculture, Hon. W. B. McPherson, is chairman of the general committee, and through his good offices the Federal Government at its last session voted an initial grant of \$1,000,000 in order to allow the committee to proceed with the preliminary work. This is being directed by J. A. Mooney, the manager, and D. T. Elderton, the secretary. The preliminary services have also been secured of Ernest Rhoades of the Federal Department of Agriculture, at Ottawa, whose experience as secretary of the World's Poultry Congress held at Ottawa in 1927, will be extremely valuable in getting this new world event off to a good start.

Steps are now being taken to prepare an announcement and price list for world-wide distribution. This publication will be issued in that it will contain a list of the various products which will be offered for agricultural products. One example of this is the class for hard red spring wheat which carries a first prize of \$2,500 and fifty other prizes ranging down to fifty dollars. Total prizes will amount well over \$200,000.

Included in the competitive classes are wheat, oats, barley, corn, rye, buckwheat, rice, millet, flax, peas, field beans, and the hard red spring wheat, alfalfa or lucerne, red, white, and yellow Dutch clover, timothy, clover, top bent, Kentucky blue, Canadian blue, the Fescues and the Agropyron species, timothy, field roots and garden vegetable seeds.

Such a prize list provides causes for every province in the Dominion to be a great many other countries.

The competitive classes, international, national and provincial, national exhibits, and commercial displays may be termed the spectacular side of the event. There is the other side from which Canadians hope to gain much, and that is the conference.

Thousands of research workers along grain and seed lines are busy in all parts of the world attempting to solve the problems incidental to the production and marketing of these products. In 1932 Canada will be the mecca for these experts, and the farmer will also hear and question these men, and it is hoped learn the solution of many of the problems with which he is now confronted. Everything will be discussed from soils to markets, plant diseases and insect pests, and farm machinery.

Grains from this year's crop may be the winning entry, and it behooves the grower and prospective exhibitor to commence his selecting at once. The selection for seed for the 1930 and 1931 crop is also a point which growers would do well to keep before them, with the possibility of entries in the World's Grain Exhibition always in view.

**White Blackberries**  
A Georgia gardener two years ago, found a white blackberry bush in the woods. He took a cutting from it and succeeded in cultivating white blackberries, the latest horticultural freak. The white berry tasted the same as the black, but it has not yet been determined whether the bush will be fertile.

Eighty and dogs were taken by Commander Byrd on his Antarctic expedition.

## Increases Egg Production

Experiments Show Advantage Of  
Open Windows In Poultry House

Experiments at the University of Wisconsin have shown the opening of the windows of the poultry house is nearly as effective as exposing them to the ultra-violet rays of a quartz mercury lamp or feeding them cod liver oil. The tests were supervised by E. B. Hart and J. G. Halpin, heads of the Agricultural Chemistry and Poultry Husbandry Departments, respectively.

Eight pens of pullets, consisting of 50 birds each, were used to compare different methods of keeping the flock from October to the end of April. A total of 2,337 eggs was laid during the seven-month period, by the pullets kept in houses where the windows were kept closed. The production was raised to 3,265 eggs when the birds were treated daily with the quartz mercury lamp. A third which was both irradiated and exposed to the sun made the highest record, its production being 3,269 eggs.

## Sage Brush As Feed

Those Of Western Plains Superior To Much Of That Grown Elsewhere

Analyses made by the Dominion Chemist at Ottawa, show that a number of the sage brush of the western plains possess fair percentages of protein, especially in the younger plants. In this respect they are superior to many of the grasses. According to authorities, many species of sage brush are forage plants of considerable value, especially for sheep. One author states: "Whole bands of sheep will leave all other forage and feed on sage-brush for a day or two at a time; after that they may not touch it for days or even weeks."

**Winnipeg Newspaper Union**  
The cape theme so smart in grown-up styles has entered the junior mode in military cape coat. Illustrated in navy blue homespun it is quite the most fashionable and practical idea of the moment for girls of 6, 8, 10, 12 and 14 years. A long, hugo brass button at neck and one at waistline holds the garment closed, and adds decorative note. A stitched belt defines waistline. Style No. 604 is made at half saving. In the 8-year size the coat is exactly, it takes but 2 yards of 54-inch lining. Lacquered suede finish, brown, black, green velvet, ultramarine and chic for this attractive coat. Pattern price 25 cts. in stamps or coin (see in preferred). Wrap coin carefully.

## Canadian Eggs Enjoy Excellent Reputation

Imports For Britain Have To Bear Identification Mark

Canadian eggs have earned a fine reputation in the Mother Country as a result of the care that is taken in their production and in the grading and methods of marketing. From now on they will be required to meet a keener scrutiny in the British market. In accordance with a new regulation put in force by the British Government all imported eggs will have to bear an identification mark placed on each individual egg. Mr. W. A. Wilson, the agricultural products representative for Canada, in Great Britain, has expressed his view of Canada's prospects under the new regulations that have been introduced by the Merchandise Marks Act and the Grading and Marketing Act, recently put into force. These measures require that all imported eggs be individually marked for identification with ink. In the month of April, Mr. Wilson visited the egg producers who were particularly in demand in price range from two to ten shillings per 100 hundred more than stamped fresh eggs from any country. This, he says, is a direct outcome of the new "marking" law, which has enabled consumers to know what they are buying. The production of fresh eggs in England, however, has but a limited season. When these so long-mooted demand, Mr. Wilson is quite hopeful that such Canadian eggs as are available will find a ready demand on account of their good quality. The present time, however, Mr. Wilson regards as one when producers, dealers and exporters should exercise their utmost care so as to ensure that the eggs go forward only in the freshest condition possible.

**Wanderlust Of The Birds**  
Explanation Of Their Migrations Seems To Be Impossible  
We call our restless age a stable stay-at-home country, and some of the birds, but no one has yet satisfactorily explained the phenomenon of these migrations of millions. Why do the birds of the Northern Hemisphere make these long, annual treks, while the phenomenon is so uncommon in the Southern? What makes the birds so restless before the cold weather comes and the food supply gives out? Is it some strange, inherited premonition? That is a hypothesis, but it only suggests another mystery; for how explain such memories in birds, and not in the king of the beasts, man?

## Mission Of A Newspaper

Is To Publish What Intelligent Readers Will Enjoy

"A newspaper's highest mission," said Louis J. Jaffe, editor of the Virginian-Pilot, in addressing the Institute of Public Affairs, in Charleston, W. Va., "is not to give the public what is relished and smirked over by readers of lowest mentality, but rather to present what is enjoyed and welcomed by readers of more than average intelligence and discrimination." It can hardly be denied that a general adoption of this ideal would lift the thought of newspaper readers to a higher level.

## Honor Canadian Pacific Men

Life-saving certificates of the Royal Canadian Humane Society were recently presented to Port McNicoll by Hon. Wm. Finlayson, Ontario Minister of Lands and Forests, to Car Inspector Alex. McCullagh, No. 1, Constable Harry Goyes, No. 2, and Chief Clerk J. A. Davidson, No. 3, all Canadian Pacific employees stationed at Port McNicoll who last March rescued from drowning Mrs. Gaudreault, her 3-year-old daughter and Margaret Swales, who were crossing the lake from Victoria Harbor to Port McNicoll, when the ice gave way. In making the presentation Mr. Finlayson pointed out that railroad men were at all times cool and collected at a crisis.

## Another Titled Rancher

Former Ruminator Prince In Raising Muskies In Alberta

Alberta has added one more to her list of titled ranchers. This time it is a Russian prince, remotely related to the deposed royal family through an alliance in the days of Peter the Great, but of recent years more or less a wanderer on the face of the earth in a search for a happy home where Bohshievskism ceases from troubling, and princelings are at rest.

Prince Len Gullitsov, twenty-five years old and married just about a year, is this latest royal rancher. He has bought over 100 acres of land on the McLeod River, five miles south of Edmonton, right in the heart of the big game country, and there he is going to raise—muskies!

On the land there is a lake which covers 100 acres, and this is to be the habitat of the colony of muskies. The prince plans to develop there are already a few hundred musky ranches on the place, but a much larger number will have to be introduced to make the ranch a paying proposition. The lake is to be stocked with muskies, and the prince is going to work of \$2,000.

Much of the farm work is to be done by the prince himself, though he has a manager and a few helpers. He has studied far farming, intensively and has a number of books on the subject. He is to put to the test of practice, those having been endorsed by the professors of agriculture of Lounville University, where he studied for some years. It is not expected, however, that the ranch will pay dividends until about 1932.

## Airplane Shipments

Comprise Many Things Great Baking Firms Use Service

Fast-Sending Mailmen and a few helpers. He has studied far farming, intensively and has a number of books on the subject. He is to put to the test of practice, those having been endorsed by the professors of agriculture of Lounville University, where he studied for some years. It is not expected, however, that the ranch will pay dividends until about 1932.

Perhaps the most striking of all tributes to the business value and dependability of the aeroplane is to be found in the fact that great baking firms now send cargoes of buns by air almost every day. The "bun" aeroplane, with its previous cargo in charge of an armed guard, is an established feature air traffic.

A man has been sent as cargo in a goods aeroplane. Missing the last passenger machine, he noticed a cargo "plane ready for flight. The goods were labelled with the name of the man, and he was told to go to the town to which he wished to go. So he had himself packed up and labelled and put in with the rest of the cargo. The aeroplane reached its destination, and the man, having paid the freight charges on himself, was duly delivered.

## Solves Rent Problem

Andrew Boltz, 28, has solved the rent problem of a great number of working all day at the new \$4,000,000 breaker which he is helping to erect for the Philadelphia and Reading Coal and Iron Company, at Locust Summit. Boltz climbs up a ladder to a tarpuin which he has suspended by 20-foot ropes from the limbs of two tall trees. When he crawls in, the weight of his body pulls the tarpuin shut at the top, making his bunk weather-proof.

Ants detect enemies and identify friends by the sense of smell, experiment shows.

# Growth Of Juvenile Immigration From Britain Is Satisfactory To Colonization Officials

## Nothing To Criticize

Conditions In Peace River Country Are Good, Says Hon. Geo. Hoadley

No country has ever been pioneered where medical, surgical, nursing and other social services have followed the wave of settlement with such rapidity as in the so-called Peace River country.

Such was the statement made by Hon. George Hoadley, Minister of Health in the Provincial Government, when his attention was drawn to a press despatch from Montreal in which Hon. Evan Morgan, son and heir of the Earl of Trollope, was quoted as stating the north country was not yet ripe for Anglo-Saxon settlers, "owing to the lack of medical, especially surgical and medical." He was a member of the Chamber of Commerce party that recently visited the north.

"I think it is extremely unfortunate that statements such as are attributed to Hon. Evan Morgan, should have been made," said the minister. "During the past few years, numerous men have travelled throughout the Peace River area, whose lives on the North American continent have made them familiar with conditions incidental to a pioneer settlement, who, without hesitation, have expressed themselves as being astonished at the admirable conditions that exist in the Peace River area from the standpoint of transportation and social services, having regard to the brief period that has elapsed since the beginning of settlement."

"In regard to the statement attributed to Hon. Evan Morgan that it is not yet ripe for settlement of the Anglo-Saxons, may I draw his attention to the fact that numerous areas throughout the world have been pioneered successfully by them under more onerous conditions than exist in the Peace River area," said Hon. Hoadley.

## Results Of Tree Planting

Success Of Work On Prairies Is Very Apparent

Advent of a dry season this year calls fresh attention to the work being done by the Forest Service of the Department of the Interior, in distributing free trees to prairie farmers. The approximately 8,000 seedlings and cuttings are now being sent out annually, and travelers in the western provinces can see for themselves the success of the work. Not all or nearly all of the annual distribution results in actual forestation, but a good percentage of the seedlings, when carefully planted and tended, grow into trees which not only beautify the prairie but serve also as most useful purposes. Forests have the effect of moderately reducing the temperature of air and soil, and render the climate more equable. They increase the humidity of the air and reduce evaporation. They tend to increase precipitation of moisture, though this tendency is not great on the plains. They help to regulate water supply, making stream flows more continuous. They also provide shelter for man and beast alike, a consideration not to be neglected on the windy prairie.

It is to be said that the widespread planting of trees will abolish all fears of prairie drought. But trees will do a little towards increasing rainfall, and will do much towards conserving moisture in the soil. For this reason, quite apart from the aesthetic and economic element, must be congratulated on its work, and the farmers encouraged to avail themselves of the free service offered—Manitoba Free Press.

## Just a Century Ago

Sir Henry Hawkins, later Baron Brampton, relates in his "House of Commons" how as a small boy he once saw the corpse of a boy no older than himself borne on a farm wagon. This boy had been taken for robbing an orchard. In 1832 a boy of nine, so George Godwin writes in "The Future Of Canada," was sentenced to death at the Old Bailey for stealing twopennyworth of wheat; the sentence was executed.

He who knows only his own side of the case, knows little of the case.

## Plans For considerably increasing the flow of suitable British settlers to Canada were discussed at the annual conference of officials of the Colonization Department of the Canadian National Railways, which was held at the headquarters offices in Montreal, recently.

The chief matter under discussion at the conference in British immigration. Satisfaction was expressed at the considerable increase shown in this class of settlement this year over the previous season, and plans were discussed which were calculated not only to bring out a greater number of Britishers suitable for land settlement, but also to improve still further the conditions under which they are being settled.

The chief reported having had an interesting conference with Hon. J. H. Thomas, during his visit to Montreal. The growth of juvenile immigration from Britain is making in the manner in which the young lads who have come out to farms are making good, was one of the matters further discussed. It was stated that the conference, H. M. Pym, superintendent of juvenile immigration for the railways, had been in Canada, he had been able to visit some of the boys who had come out this year and was greatly pleased at the progress they were making and with the good class of homes on which the boys were placed. He had been impressed with the success of such organizations as the Rotary Clubs were doing in taking a brotherly interest in the British boys who have been placed on farms.

## Advices Zones For Campers

Superintendent Of Peace Albert National Park Would Please All Types

J. A. Wood, superintendent of Peace National Park, is making before the Board of Trade Executive, at Saskatoon, advised dividing of the park into zones in accordance to please all types of campers.

In the southern areas, containing the Peace River, would be suitable grounds suitable for cottages and tents for those who desire convenience of many descriptions and have adequate gear.

In a central area there would be ground for "semi-campers." These would provide tenting accommodations but include modern conveniences.

For those who prefer real camping, canoe trips and portages, the northern area would be reserved. Those who used this section would be what Mr. Wood termed "100 per cent campers."

He believed the area unique in that within its boundaries was a tableland which was really in the centre of the province.

## A New Fish Story

A gentle decline in the salmon runs of the Fraser River, four men from New Westminster, were shooting down the fast currents in a boat recently, tired and discouraged, for what had started out as a happy hunting and fishing trip, and yielded them naught but bad temper. There was a splash of water and something glimmering and over the boat's gunwale two and a half feet above the water, it fell at their feet, flopping vigorously. Two pounds it weighed, a salmon.

Many a self-made man might be tempted to conclude that the job is somebody else.

Professor: "I have succeeded in making many mistakes understandable now, but not one of them."

Assistant: "Try talking American to them."—El Travieso, Rome.

THEY

Red Rose Orange Pekoe Tea is truly economical. A half pound makes almost as many cups as a full pound of cheap tea costing 50c to 60c.

## RED ROSE ORANGE PEKOE

"is good tea"

RED ROSE ORANGE PEKOE is extra good

In the best package—Clean, bright aluminum

### WORLD HAPPENINGS BRIEFLY TOLD

Farmers in Alberta who suffered damage to their crops by August hailstorms have been paid a total of \$75,000 by the Alberta Hail Insurance Board.

The Dorrier seaplane recently announced that the new huge 12-motored Dorrier D-OX seaplane recently constructed by the company would attempt a flight to America in mid-July, 1930.

A commission of inquiry into the causes of the recent outbreaks in Palestine was appointed at London, England, by Lord Passmore, British Colonial Secretary, it has been officially announced.

A report on a special shipment of Garnet wheat to Great Britain will likely not be made public until near the end of the year, it was stated at the Department of Agriculture recently. It will require that length of time to gather all the data.

A report has been received from Professor Eisberg's surgical university clinic that three Austrian bacteriologists, Edelmann, Schoenbauer and Scholler—have confirmed previous experiments which indicated discovery of anti-cancer serum.

The differences between Great Britain and the United States over parity and disarmament as affecting cruisers, have narrowed to a mere question of three or four 8-inch guns, and also a tonnage of 15,000.

The Irish Free State will be a candidate for a seat on the Council of League of Nations at the next election, it was stated in ministerial circles. When Canada's three-year term expires the Free State is considered to have a good prospect of getting a seat.

### Chinese Massacre Moslems

Three Thousand Siam Because They Rebelled Against Authorities. Reports from Central Kansu province stated that Chinese had executed an appalling massacre of Moslems there, the victims numbering at least 3,000. Details were lacking, but it seems the Moslems rebelled against Chinese authorities, whereupon they were slain.

According to reports, the executions were carried out under guise of a conference with Moslem leaders. The victims were separated from their wives and then put to death. According to the reports the Moslems died silently.

It is indicated that the Chinese now fear Moslem retaliations, possibly causing renewed civil war, which in 1918 caused the death of many thousands of Chinese and Moslems in Kansu.

London is now regarded as the centre of the stamp collecting world.

### Flowers From Praries

Flourish in France

Wild Crows Decorates Graves of Canadian Soldiers

The prairie anemone, familiarly called the wild crows, blooms on the graves of Canadian soldiers in France. W. L. Ramsay of Blackwell, Saskatchewan, sent the seed across. Three of Mr. Ramsay's sons went overseas with the Canadian Expeditionary Force, and two were buried in Flanders field. Mr. Ramsay has had word from Captain S. B. Parker, one of the staff concerned in the care of soldiers' graves, that the anemone seed has blossomed into flower. The nature of the petals has appeared as dark purple, a change which is thought to be due to oxide of iron from shells embedded in the ground. Captain Parker, who homesteaded in Western Canada and knows the wild flowers of the country, writes that Mr. Ramsay asking for specimens of prairie wild life—the anemone, is it correctly named. He agrees with Mr. Ramsay that a display of Canadian flowers from the prairie would be an appropriate decoration for the graves of Canada's soldiers and show, in Mr. Ramsay's phrase, that the flower of the land is not forgotten. Captain Parker is stationed at Arras, France, and his address is 1000 Bloor Street, W. Toronto. Graves Commission, Place de la Gare.

BERTHA COLLAR

A quilt pattern for girls of 6, 8, 10, 12 and 14 years is illustrated in Style No. 607 with berth collar, girly tips, and soft gathered fullness in skirt. The model was made of cloth in tomato red and white. The pattern is available in printed form in yellow and white with berth collar of white organdy, checked gingham in pink and white with white organdy, or six years later in ecru, voile, nine sheer linen, orchid and red and white printed. For parties, silk and velvet and select knit fabrics, nine green crepe de chine or sky-blue organdy crepe. Later for classroom, it can be made of blue blue crepe, printed chamois in delft blue tones on beige ground, and rust brown cashmere jersey. Pattern price 25 cents in stamps or coin (coin is preferred). Write coin carefully.

## The History Of Vaccination

Vaccination Recognized As The Only Efficient Means By Which Small-Pox Can Be Controlled

Dr. William Osler, the famous medical man, once remarked that "There is always a group of individuals in every community of that peculiar order of mind which renders them incapable of sane judgment and who seek in every way to oppose vaccination and vaccination is not only for themselves but also for others."

We have found this to be so in Canada, and we have not the slightest doubt that if a small-pox epidemic were to make its ghastly presence felt tomorrow, there would be the usual handful of people to raise a hue and cry against vaccination.

Yet vaccination is recognized by all public health administrators as being the only efficient means by which this disease can be combated. And it is equally true that vaccination properly performed is absolutely devoid of danger to life or health. Let us look back into the pages of history and find out what has happened on before vaccination was introduced. We find that not ten years passed during the seventeenth century without the occurrence of devastating epidemics of small-pox in Europe. Small-pox was the king of diseases prior to a change which it brought in 1788. A French writer, Monsieur de la Commaudie, said that it was the cause of one-tenth of all the deaths among mankind.

Macaulay, the English historian, in writing about conditions in his country says: "The havoc of the black plague has been far more terrible than the plague visited our shores only once within the living memory, but the plague was always present, filling the churchyards with corpses, leaving on those whose lives were spared the hideous traces of its power, turning the babe lying in the cradle into a thing which the mother shuddered; making the eyes and cheeks of the betrothed maiden objects of horror to her lover."

In fact, Macaulay concludes, "Smallpox is the most terrible of all diseases of death."

Mexico was stricken with an epidemic in the sixteenth century, and 3,000,000 of its inhabitants died, leaving scarcely enough people to man the country. The historian Godfrey records that 2,000,000 citizens of Russia died of small-pox in a single year. The tribes of American Indians were wiped off the face of the earth by the scourge. Before the war in his writings, in 1603, whole races of men in Brazil were cut down. Iceland was invaded by the disease seventeen times prior to 1707. In Canada's history of Greenland, we find that in that year 18,000 people died of small-pox out of a population of 50,000. The dead were buried in the houses were depopulated, misery was everywhere.

Nowadays, while we encounter small-pox in serious proportion, there is nothing to match these figures in present day history. So you see, we have plenty of reason to be grateful to Dr. Edward Jenner, the Englishman who gave vaccination to the world.

Vaccination was discovered by Jenner, an Englishman. About 1750, a dairymaid living near Bristol visited a young student named Jenner. Although she was suffering from the disease, she confidently asserted that it was not possible for her to get small-pox because she had already had cow-pox.

This little incident had the same effect on Jenner as the falling apple on Newton. The young scientist started thinking and it did not long before he was a world-renowned scientist. As a result of his experiments, six years later he inoculated an eight-year-old boy from one of his patients who had cow-pox. A mild case of cow-pox ensued with the child. Two months later the boy was inoculated from a pustule of a patient suffering from small-pox. No illness resulted and it was repeated. There was still no ill effects, the young scientist Jenner knew that he had discovered the way to save his knowledge to the world.

## ASTHMA

QUICK RELIEF offered by Dr. J. M. Guild's Green Mountain Asthma Compound. It is a powerful and efficient remedy for all cases of asthma, whether of the chronic or acute type. It is a powerful and efficient remedy for all cases of asthma, whether of the chronic or acute type. It is a powerful and efficient remedy for all cases of asthma, whether of the chronic or acute type.

## Breaks Up Gas In the Stomach

Don't suffer from dangerous gas pressure, indigestion, flatulence, or indigestion. It is a powerful and efficient remedy for all cases of asthma, whether of the chronic or acute type. It is a powerful and efficient remedy for all cases of asthma, whether of the chronic or acute type. It is a powerful and efficient remedy for all cases of asthma, whether of the chronic or acute type.

On this continent the first vaccination performed was by Dr. Boylston on his own son in Boston. In 1801, one year after this he inoculated 247 people, and every one escaped the terrible epidemic that had engulfed New England at that time.

Of course, there was a violent demonstration against Dr. Boylston as he was regarded and treated with contempt. Every method of interference was used, just as they are used today. Ben Franklin opposed vaccination and he wrote that, "I will never owe my health to a disease." Benjamin Franklin opposed vaccination and he wrote that, "I will never owe my health to a disease." Benjamin Franklin opposed vaccination and he wrote that, "I will never owe my health to a disease."

You will readily see that vaccination is a safe and efficient method of preventing small-pox. It is a safe and efficient method of preventing small-pox. It is a safe and efficient method of preventing small-pox.

There is an abundance of evidence to be obtained for these people who sincerely want to weigh the facts between the dangers of small-pox as compared with the benefits of vaccination as a preventive. People of sound judgment will not hesitate which to choose.

### Recipes For This Week

(By Betty Barclay)

#### BANANA CUSTARD WHIP

1 package lemon junket.  
1 pint milk.  
3 bananas.  
1 cup white.  
1 cup sugar.

Warm the milk until lukewarm—not hot—and dissolve the lemon junket in it. Have two of the bananas sliced into the dessert glasses; pour junket over them. Let stand in warm place until set; then chill. Mash the remaining banana, add egg white, sugar and lemon juice, beating until thick. Add as topping when ready to serve.

#### PICKLED REDS

Pickled sweet red peppers make a delightful garnish for cold meats or salads. Wash and dry peppers thoroughly, then cut a slice from the stem and remove seeds. Cut either in thin strips with scissors or into ribbons by working around and around the pepper with a sharp knife. Scald well then drop into warm water to crisp. Drain well. Make a syrup, using a proportion of one cup sugar to two cups vinegar. Put peppers into clean, hot jars, fill to overflowing with hot syrup and seal.

### Permanent Civil Servants

1,000 Employees Of Federal Government Attain New Status

With the passing of an order-in-council, which has an important bearing on the pensions branch of the Department of Pensions and National Health, 1,000 employees of this branch become permanent civil servants. It dates from June 1. The pension branch of the department has now been made permanent, and the civil service commission has classified the employees engaged in this work.

About 450 government employees in Ottawa are directly affected by the change, about 150 in Toronto, 250 in London, Ont.; 155 in Vancouver, 84 in Winnipeg; 72 in Calgary, and smaller numbers in other Canadian cities where the department operates hospitals for disabled veterans.

Not Dependable

According to Dr. Morris Fishbein, "a man's best friends are his hair and teeth." And, sad to relate, even they are sometimes false.

## SUNDAY SCHOOL LESSON

OCTOBER 13

KEEPING FIT FOR THE SAKE OF OTHERS

Golden Text: "Know ye not that your body is a temple of the Holy Spirit which is in you, which ye have from God and ye are not your own, ye are bought with a price; glory God therefore in your body." Lesson: Daniel 1:8-20; Corinthians 1:9-27; 1 Timothy 4:7-12; 2 Timothy 2:15-17. Devotional Reading: Psalm 66:1-4, 16-20.

### Explanations and Comments

The young men who gave up wine and dances for water and plain fare were strong both physically and intellectually. Their fine appearance was noteworthy, and best of all, not only were they fairer and healthier for their abstinence, but their brains were clearer and they had more knowledge and skill in all learning and wisdom.

The results of the experiment was no surprise to them. A newspaper contains an account of an experiment made in the village of Hickington, England, which was a surprise to the villagers. Some of the villagers were so grieved by the faults of the keepers of the public houses because of their political opinions that they formed a league among themselves to keep the beer-houses for twelve months. The experiment was successful, and the villagers were so grieved by the faults of the keepers of the public houses because of their political opinions that they formed a league among themselves to keep the beer-houses for twelve months. The experiment was successful, and the villagers were so grieved by the faults of the keepers of the public houses because of their political opinions that they formed a league among themselves to keep the beer-houses for twelve months.

All the world knows that food and drink are necessary to the body, and that intoxicating drinks and sumptuous diet are harmful to both. The body is a temple of the Holy Spirit, and it is our duty to keep it pure and healthy. The body is a temple of the Holy Spirit, and it is our duty to keep it pure and healthy. The body is a temple of the Holy Spirit, and it is our duty to keep it pure and healthy.

"Straight Talk on Alcohol" says: "An amount of alcohol which one man might seem to consume with impunity may be seriously injurious to another. The daily consumption of alcohol which will produce not the slightest harm to one man, may produce the most serious harm to another. The daily consumption of alcohol which will produce not the slightest harm to one man, may produce the most serious harm to another. The daily consumption of alcohol which will produce not the slightest harm to one man, may produce the most serious harm to another."

### Look Year To Cool

Mirror For Telescope Weighs Ton and a Half

A huge mirror which took nearly a year to cool down has been made in America for a large reflecting telescope. Weighing more than a ton and half, it is 60 inches in diameter and 10 inches thick. Discs of glass of this great size are very difficult to get free from defects, and when the molten glass is poured into the mould it has to be kept hot by electric heaters and cooled down over a period of many months.

### Gave Police the "Jumps"

What was thought to be a "tins bomb" when it burst in a police office employees at Ranger, Texas, was found to be a quantity of Mexican jumping beans tumbling against the tin lid of their container.

## Head Colds relieved with vapors

Snuff a little Vicks well up the nose or melt in a spoon or cup of hot water and inhale.

Medicated vapors reach the air passages direct. For other cold troubles rub Vicks on throat and chest.

2 Vicks VapoRUBS OVER 15 MILLION JARS USED YEAR

### West Going Ahead

Development Taking Place On All Sides Says C. N. B. President

"There is a silver lining to the cloud of gloom as the situation in Western Canada is concerned," stated Sir Henry W. Thornton, chairman and president of the Canadian National Railways, on returning to his office in system headquarters, Montreal, after a tour which took him throughout the western provinces and to the Pacific Coast. "While it is true that the west is not harvesting such a bumper crop as in average years, and it is also true that some farmers and some districts are hard hit, it must be remembered that there are districts and farmers in those districts who have harvested better crops than they anticipated a short time ago, and who are reaping the benefit of higher prices from their hold-over grain from last year, and also higher prices for the grain which they have produced in 1929."

"The west has gone ahead and is going ahead; building up on a basis of sound progress and, going from the east cannot fail to be impressed with the same development which is taking place on all sides. On the Pacific Coast in particular, the development of trade with the Orient is being closely followed, and there is also a keen realization of the fact that Canada is sharing and will share to a greater degree in the further development of that trade. Sir Henry said, concluding with the statement that he had inspected the properties of the system in each of the provinces visited and he had found things in good condition everywhere with the officers and employees keenly on the alert to provide the best service to its patrons."

### Answer Was Correct

A census clerk in scanning one of the forms to see if it had been properly filled up, noticed the figures "120" and "112" under the heading "Age of mother, if living." "Age of mother, if living," said that your parents were never so old, were they?" asked the astonished clerk. "No," said the clerk, but they would have been if living."

"Are you really a doctor of philosophy now?" "Yes."

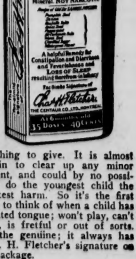

Well, tell me how to keep my temper when the cleaner ruins my best frock."

The pole star is always directly over the north pole.

### When Babies

Babies will cry, often for no apparent reason. You may not know what's wrong, but you can always give Castoria. This soon has your little one comforted; if you should call a doctor, you will find that your baby is all right. Don't experiment with medicines intended for the stronger systems and infants. Most of these little ones are soon soothed away by a little of this pleasant-tasting, gentle-acting, children's remedy that children like.

It may be the stomach, or the little bowels, or in the case of older children, a sluggish, constipated condition. Castoria is still

## WISE POLICY TO HOLD GRAIN FOR HIGHER PRICES

Toronto, Ont., Declaring that only a remarkable recovery can provide for a normal wheat supply from the southern hemisphere, the Canadian Board of Commerce, in its monthly commercial letter, says it will be contrary to the present statistical position of the world wheat situation if at the end of the current season Canada is not credited with following the wisest policy in having refused to sell freely during the last two months.

In connection with the bank's comment, it is recalled that two days ago, E. R. Ramsey, general manager of the Canadian Wheat Pool, issued a statement at Winnipeg in which he maintained the Canadian farmer was not justified in reducing the price of the wheat he holds and insisting that even higher prices are justified for Canada's hard wheat.

Commenting on the small export trade in Canadian wheat which has resulted in an unprecedented congestion at lake heads, land and export port elevators in the east, the Bank of Commerce says it speaks well for the farmers of the western farming community that it has so far not been forced to sell wheat on a declining market. Referring to the fact that it is "as much the privilege of the farmers and their marketing organizations to adopt as it is of the other business interests which bargain for the best possible returns," the bank says:

### Japanese Envy

#### Sails For Canada

### Says Closest Co-Operation Between Two Countries Is Important

Tokyo, Japan.—Japan's first minister to Canada, Iyemasa Tokugawa, has sailed from here to take up his duties in Ottawa. The minister said before sailing that the most cordial bond had always existed between Canada and Japan. Now, however, affairs of the Pacific made it important that there be the closest co-operation between the two countries, not only in their own exchange of minerals, but in the peace of the world. The government was to be congratulated on the exchange of ministers, he said. He rejoiced in the presence in Japan of the Canadian minister, H. M. Marler. The whole Japanese nation welcomed him.

"I am convinced that he will succeed in his position here," the Japanese minister said. He would devote to his utmost to succeed in Canada. He would attempt to learn Canada's requirements and would make Canadian friends of the Japanese. He would attempt to bring ideas, thus contributing his small share to consolidating the understanding between the two nations. He would try to make his mission as happy as his residence in Canada.

### Predicts New Legislation

**Resolution By Government To Prohibit Liquor Exports Is Expected**  
Ottawa, Ont.—The Ottawa Evening Journal says: "The announcement by Premier MacKenzie King that the government has not the power to prohibit the export of liquor to the United States is interpreted in well-informed political circles to indicate that at the next session the government will introduce legislation to ban the export of liquor across the border."

"This would be done by refusing clearance to shipments intended for American consumption."

"If the government sponsors a resolution to prohibit liquor exports there is no doubt the measure will carry in the house."

### Present Crops Eligible

Saskatoon.—Grain from this year's crop is eligible for the World's Grain Exhibition at Regina, in 1932. J. A. Rooney, manager of the Exhibition, was in Saskatoon from Regina, and reminded seed growers that it was not too early to begin selection work.

### No Cause For Alarm

Ottawa.—That Canada has no cause for alarm regarding charges likely to be made in the existing Fordney-McCumber tariff, was the statement of P. J. Macfarlane, former North Dakota senator and now member of the international joint commission which met here.

W. N. U., 1896

## Outlines Policy Of

### Labor Government

Secretary For Foreign Affairs  
Addresses Annual Conference  
At Brighton

Brighton, England.—Palestine will remain a national home for the Jews; British evacuation of the Rhineland will be complete by December 31; no pledges have been broken in securing agreement with Russia on exchange of ambassadors; and a new treaty with Egypt will be made when the people of Egypt signify they are in support of any Egyptian government.

These are cardinal points of an outline of the Labor Government's policy on the outstanding foreign and empire questions of the day, given by Rt. Hon. Arthur Henderson, secretary for foreign affairs, at the Labor party's annual conference here. Mr. Henderson's address also included a strong plea for support of Britain and the United States, and the statement that the negotiations had reached the stage where it was hoped that Japan, Italy and France would soon be able to join in.

Foreign relations declared that with whom, of course, he acted in close consultation, the British government signed the optional clause, thereby expressed adherence to the pact of international justice at The Hague, "it gave a fresh impetus to the cause of international arbitration."

But signature to the optional clause, he said, was not enough. It provided for compulsory arbitration of international legal disputes. The British Government, said Mr. Henderson, was giving "most earnest consideration" to compulsory arbitration of other classes of disputes. "We were giving most earnest consideration" to compulsory arbitration of other classes of disputes. "We were giving most earnest consideration" to compulsory arbitration of other classes of disputes.

### Saved Many Lives

**Taxi Driver Used Ingenuity, Method To Rescue People In Burning Building**

Brooklyn, N.Y.—A handful of footpicks, carried by a cab driver probably saved the lives of more than 30 residents of a four-story block here. Seeing the smoke pouring from the building, he rushed over and found the hallways filled with smoke.

Returning to the restaurant he grabbed a handful of footpicks. Going back to the burning building, he went from door to door through the hallways, pressing the doorbells to knock in and inserting a footpick to make them ring continuously. All of the occupants got out of the building, which was gutted by the flames.

### Grain Ships Tied Up

**Boats On Lower Lakes Have Had Slack Season**

Montreal.—Eleven lower lakes bulk freighters of the Canadian Stevedores Lines have been tied up in winter quarters at Kingston, on account of continued depression in the grain situation it is announced here. These vessels have been tied up during the larger part of the season and prospects for cargo during the next two months failed to justify their maintenance in commission.

In view of the fact that grain shipments have been small this season, and more particularly during the last three months, it is expected that there will be a heavy backlog of grain to be shipped in the next year as soon as navigation opens to Montreal. The grain in the country total stocks on September 20 being 1,497,444 bushels in Canadian elevators and 22,616,658 bushels of Canadian grain in U.S. elevators, and must be moved eventually.

### Indians Demand Rights

Northern Ontario Chiefs Base Claims On Treaty Of Utrecht  
Sudbury.—Chiefs and delegates from all the principal Indian Reservations in Northern Ontario are meeting here at a general council to seek restoration of their ancient rights and privileges in the forests where their forefathers roamed.

The Indians argue their people are entitled for modern civilized life yet, that their livelihood is based up in streams and forests and that trapping is practically their only source of revenue. The treaty of Utrecht and a proclamation of George III. are the basis of their claims.

## Three C.N.R. Ships Sold

### Purchased By Navigation Co. For Vancouver-California Service

Vancouver.—Announcement is made that the Kingsley Navigation Company, Limited, has purchased the three steamers of the Canadian National Steamship service to California, and will merge it with the present sailings between Vancouver and California ports. The three ships are S.S. Canadian Rover, S.S. Canadian Observer, and S.S. Canadian Coaster. The vessels will remain under Canadian management.

The purchase price was not announced.

## Plan Junior Police Force

### Will Be Similar To Royal Canadian Mounted Police

Ottawa.—Modelled on the Royal Canadian Mounted Police system, a junior police force is to be inaugurated in Ottawa. The force will have no practical work to do at first, but it is hoped eventually it will be recognized by the police department. Formation of the junior force is expected, reduce juvenile delinquency. Officers of the juvenile court and a local service club leaders are in the movement.

## C.N.R. BRANCH LINE WORK IS WELL ADVANCED

Winnipeg.—Considerable progress has been made by the Canadian National Railways with the construction of branch lines on the prairies during the summer, according to H. A. Dixon, chief engineer of the western lines of the company. Of the 568 miles of the new line, 25 miles of steel have been laid in some cases, grading had been done as with 70 per cent. finished, and on the Aberdeen-Meffort line, 25 miles of steel have been laid in an easterly direction from the junction with the Outwash road at Wakaw. There will be a continuation of all work on these branch lines until weather conditions no longer permit.

Although the program was one of the heaviest ever undertaken by the company, only 150 miles have had no work done on them. However, plans are prepared to begin work on this mileage next year and the assurance is given by Mr. Dixon that the program will be fully completed within the three-year period defined by parliament.

In addition to this program, the company has also succeeded in getting steel into the Sherritt-Gordon mine over the branch line authorized last fall and in practically completing the first stage of ballast to Fort Churchill over the 50 miles of grade upon which a skeleton track was laid. The engineers in charge expect to have this piece of track in such shape early next summer that through freight and passenger trains will be able to operate between The Pas and Churchill by the end of July at the latest.

## Much Impressed by West

Toronto, Ont.—Crushed beneath the wheels of a huge motor truck was Ross Guggin, 21 years old, of 120 Margaretta Street, recently arrived in the city from Yorkton, Sask., met instant death as she stepped, with her hand on the street car. The driver of the motor truck was arrested by police on a manslaughter charge.

Hector Charlemont, editor-in-chief of the Toronto Saturday Night, and author of "Canadian Chronicles" and "More Canadian Chronicles" has been travelling over Canadian Pacific lines throughout the West on a combination holiday and business tour this summer. He is here seen in the grounds of the Empress Hotel, Victoria, which he visited for the first time since its construction. He was greatly impressed with the rapid growth and development of the entire city of Victoria.

## INVESTIGATE MOTION PICTURE INDUSTRY

Prof. Kenneth W. Taylor, of the economics department, McMaster University, who has been appointed by the Federal Minister of Labor to conduct the Combes Investigation Act, the preliminary investigation into the alleged collusion in the motion picture industry in Canada. This preliminary inquiry is to decide as to whether or not a royal commission will be appointed to delve into the matter, and Prof. Taylor expects to submit his report to the government in a couple of weeks.

Prof. Kenneth W. Taylor, of the economics department, McMaster University, who has been appointed by the Federal Minister of Labor to conduct the Combes Investigation Act, the preliminary investigation into the alleged collusion in the motion picture industry in Canada. This preliminary inquiry is to decide as to whether or not a royal commission will be appointed to delve into the matter, and Prof. Taylor expects to submit his report to the government in a couple of weeks.

## Foreign Minister Is Dead

### Dr. Gustave Stresemann Was Active In World Peace Movement

Berlin.—Foreign Minister Gustave Stresemann died suddenly October 3. Dr. Stresemann had been in ill health for some time, but he had not so far recovered as to be able to participate in the arduous conference at the Hague on reparations and the session of the Assembly of the League of Nations at Geneva. Dr. Stresemann was one of the foremost statesmen of post-war Europe, and with Aristide Briand, French premier and foreign minister, generally was considered one of the architects of the world's peace workers. He was president of the German People's Party, a member of the Reichstag, a former chancellor of the German Republic, and the most widely known member of the present cabinet, headed by Chancellor Muller.

Death came as a result of a heart attack after a stroke of paralysis.

### To Test R.C. Coal

Victoria, B.C.—At a meeting of fuel experts here, presided over by Hon. W. A. Mackenzie, Minister of Mines, ways of developing and widening the market for British Columbia coals were discussed, with the result that it was decided to send a sample carload of forty tons from the various collieries in the province to the new laboratory at Ottawa for testing purposes.

### Killed By a Motor Truck

Toronto, Ont.—Crushed beneath the wheels of a huge motor truck was Ross Guggin, 21 years old, of 120 Margaretta Street, recently arrived in the city from Yorkton, Sask., met instant death as she stepped, with her hand on the street car. The driver of the motor truck was arrested by police on a manslaughter charge.

## Church Union In Scotland

### Large Crowds Were In Attendance At Ceremonies In Edinburgh

Edinburgh, Scotland.—October 2 was an epoch-making day in Scottish ecclesiastical history. The union of the United Free Church and the Church of Scotland took place in the great Hall of Assembly on Annandale Street.

It was a day of joyful thanksgiving. Church bells were pealed, the school children had a holiday, and the Assembly Halls were brilliantly illuminated by flood lighting.

The Assembly Hall was transformed into a scene of great beauty and dignity for the celebration of the act of union. Formerly it was a motor car garage, but it held 15,000 persons who represented all aspects of Scottish life and all the Christian churches of Europe and the Dominions.

Intensive emotion made dramatic the significance of the act of union by the moderators. By this act the churches became merged into the Church of Scotland. Rev. Dr. John White, of Glasgow, had the honour of becoming the first moderator of the new and greater body.

## Would Prefer Being

### Ousted By Britain

### But Nova Scotia Hopes To Sell Coal In Canada

Halifax.—If Nova Scotia is to be ousted from the home market for Canadian coal it would be preferable to have it done by British coal rather than U.S. coal, though the result is largely the same for Nova Scotia. This is a statement issued by Hon. G. S. Harrington, in which the Nova Scotia Minister of Mines declared that he has no promise for improvement in the Nova Scotia coal trade in the proposal of Rt. Hon. J. H. Thomas to organize wheat shipments to England and return English coal in the ships.

Hon. Mr. Harrington coupled his statement with an appeal for a national policy which would secure the Canadian market as far as possible for the coal producers of Nova Scotia and Alberta.

## Not Worried Over Deficit

### Experts Say Situation In Britain Is Quite Satisfactory

London, England.—A deficit of \$300,000,000 is revealed in the government revenue returns for the first six months of the financial year, it is announced. But the situation is regarded by experts as being not unsatisfactory, inasmuch as the deficit is \$200,000,000 lower than for the corresponding period last year. Rt. Hon. Winston Churchill, as chancellor of the exchequer until a few months ago anticipated a reduction of \$60,000,000 in the revenue over the whole year.

### Business Still Increasing

Regina.—The local post office, which has been claimed as the oldest doing the greatest business in the Dominion per capita of population of the city, showed a general increase in business in September over the corresponding month in 1929.

## TRADERELATIONS WITH RUSSIA WILL BENEFIT CANADA

Vancouver.—Resumption of relations with Russia is one of the most important things which can happen in development of Canada's trade in the opinion of Sir John Aldrich, president of the Bank of Commerce, who was in Vancouver, en route to Japan, where he will represent Canadian bankers at the Institute of Pacific Relations Congress.

"It is unthinkable that present conditions can continue," said Sir John in the course of an interview. "By resuming relations with Russia I believe Britain and Canada will get a good part of the trade now being enjoyed by Germany and the United States."

While Russia is not listed among Canada's principal trading partners at the congress, Sir John is hopeful that it will take some part. He believes that it will be of vital import as a factor in better relations with Russia, Transportation and radio.

Sir John believes, will play an important part in negotiations with the congress. While countries are not bound by the decision of their delegates he believes the meeting will have a beneficial effect on business and relationships.

## WOMEN CREATE DISTURBANCE AT LABOR MEETING

Brighton, Eng.—Fighting all the way, two women Communists were carried out of the Labor party's conference here. A man had just been ejected from the public galleries on the other side of the hall, after showering the delegates with leaflets, if the ejection of the women was a more difficult matter.

"Release the imprisoned miners," the women shouted. Stewards rushed to them but the women had handcuffed themselves to the railing of the gallery.

The women screamed and shouted while the perspiring stewards tried to break the chains. "Down the stewards! Stop the noise by placing them," the chairman of the women's mouth. One of them broke loose and was dragged with a handkerchief, and was broken loose again and hit the stewards.

A delegate rose to protest that if his womanfolk were treated like to second women in the "firing line," the chairman continued.

"I don't mind a certain amount of this kind of thing, but it's getting beyond me," the chairman said. If it continued he would have to clear the public galleries.

The closing of the sitting passed off quietly, with the discussion of the proposed changes in the Labor Party's constitution. A delegate proposed that the name of the Labor Party be changed to "The Workers' Party." Rt. Hon. David Lloyd George, Rt. Hon. Winston Churchill might be a labor candidate. "I would like to know what would happen to the rest of them if they made amendment," replied Rt. Hon. Arthur Henderson, secretary of State for Foreign Affairs.

## Retiring Postal Officers Are Honored

### Winnipeg Men Receive Evidences Of Appreciation From Office Staff

Winnipeg.—Two postal officers with long and honorable records have been honored by the office staff of the Winnipeg post office. The retiring postal officers, Mr. H. H. Finney, and Mr. H. H. Finney, were honored by the office staff of the Winnipeg post office. The retiring postal officers, Mr. H. H. Finney, and Mr. H. H. Finney, were honored by the office staff of the Winnipeg post office. The retiring postal officers, Mr. H. H. Finney, and Mr. H. H. Finney, were honored by the office staff of the Winnipeg post office.

## Dog Causes Boy's Arrest

### Did Not Bark and Police Figured Burglar Was Known

Toronto, Ont.—A 13-year-old boy was arrested charged with the theft of jewelry valued at \$3,000 from the home of Samuel Langdon, here. The arrest was brought about by the silence of the Langdon's pet dog, which had kept silent while the boy stole the jewelry from a miniature safe.

### When Mrs. Langdon Told Detectives that she thought it strange that the dog had not barked, they searched down to people whom the dog knew. They questioned the boy and he finally confessed, they claim.

## British Youth Seriously Hurt

### Lost Leg When "Biting Rugs" In Route To West

Port Arthur, Ont.—Fifteen-year-old Sydney Chapman, new to this country from Whitby, Northumberland, was seriously injured when he lost his leg when "biting rugs" in the route to the "Golden West." He lies in a serious condition in a local hospital, near a leg and with his attendance hospital, once narrowed their search down to people whom the dog knew. They questioned the boy and he finally confessed, they claim.

## The Singing Fool

By HUBERT DAIL  
Copyright, 1921, Warner Bros. Pictures, Inc.

### SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, wins fame as a composer of popular songs. He marries Molly Winston, a ballad singer, and makes her famous too. Molly and Al have a baby, Junior, whom Al adores. Molly becomes interested in John Perry, who leaves Al. One night, after Al has taken Molly home from the Club Bongo, where he is part owner, she turns on him in a rage, saying she doesn't love him. Al believes it is a mood, but when Molly rails to appear at the Club Bongo the next evening he calls her a female. Molly, voice unsteady, says she hates the words, as the "phone door flies open."

### CHAPTER XVI

Once more Al seized the door of the "phone booth and slammed it hard—to stay shut this time. Then he turned back to the "phone. He suddenly decided that he must make things up with Molly now—he would cast all pride aside and frankly beg her to do it.

"Sweetheart," he pleaded, "let's start the new year right. If there's anything I've done, I'm sorry. . . . Let's make up. . . . There was a long silence, then the faint murmur of a feminine voice, whose words he didn't understand. A start of fear shot through him, but he persisted.

"I love you, Molly; you know how I love you. I can't bear to have you cold toward me."

Now the voice at the other end was stronger; he suddenly realized it was not Molly's voice at all, but the maid's. He heard her quick, distraught words come travelling over the wire like bullets.

"Mrs. Stone is not here. She has gone away."

"Gone away?" Al exclaimed. What do you mean?

"Yes, sir; Mrs. Stone has packed up her things and gone. She left a letter for you."

"Packed her things! Left a letter!"

Al looked at the letter, he seized it and the maid discreetly retired. Al had a terrible dread of opening it, but he nervously tore it open. It was his wife's letter. Then he read the fearful message in Molly's distinctively vertical handwriting:

"Al! I'm leaving—don't try to persuade me to come back. I don't love you—I never did love you. It was hard enough to bear before John Perry came into my life. Since then it has been impossible."

Al looked up from the letter with a cry of rage and pain. For the first time he saw the whole situation in one blinding flash. Molly not only failed to love him, but she loved someone else. And that someone was John Perry—suave, immaculately dressed John Perry, Al had believed was his best friend. He realized now that Perry, whom he had trusted implicitly, had betrayed that trust from the first. Then another phase in the letter seemed to throw into his brain—Molly said she had never loved him, she had loved a man from the moment she said she would marry him!

For a moment this sense of bitterness and contempt dominated all other thoughts and emotions in him. The sense of being cheated, not only by Molly, but by the whole world, weeks, months, years, made him turn on both Molly and John Perry and blast them with scorn.

He recalled the countless times he had overlooked Molly's petulant moods, selfish caprices and savage outbursts. He remembered the phase in the letter which said she was loyal and fine underneath.

Now, suddenly, his thoughts turned to John Perry. He read on:

"I was going to leave the baby, but he woke up as I was leaving. He held out his arms to me and, after all, he is more mine than yours."

Al ran to the nursery. The dresser drawers had been open. There were evidences of hasty packing all about. Some of Junior's toys lay scattered about the floor, among them his favorite, a woolly dog. His pillow had been thrown in the corner.

Al stood, dazed, gripping the foot-piece of Junior's bed. Where had Molly taken his boy?

For a moment Al was possessed by the determination to find Molly and Junior tonight—then he realized that the plan was futile. In this city of several million persons and countless skyscraper hotels Molly and John Perry could have taken Junior, hiding away without difficulty.

After that note Al did not doubt that Perry was with Molly. Perhaps even now they were speeding toward Boston in Molly's Rolls-Royce, or they might have caught the train for Florida several hours ago. He went quickly to the "phone and called up the garage.

(To Be Continued.)

**The Poor Man's Friend.**—Put up in small bottles that age rapidly. It is the best for a very small sum. Dr. Thomas' Electric Oil possesses power in concealing the signs of age. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

**Sulphate Plant**

Large Plant to Be Erected About 10 Miles South of Moose.

Within the next sixty days, construction work is to be started on a large sulphate plant some sixty miles south of Moose. The plant will draw the sodium sulphate deposits near Horseshoe Lake, a short distance southeast of Ormiston. By June of next year, it is expected to be in operation. The Portland Cement Corporation of Charleston, West Virginia, is the company behind the undertaking.

**Minard's Liniment for Warts.**

The up-and-coming young man is pretty likely to succeed, unless he is up at four and just coming home.

All things come to those who wait—except the man who owes you money.

**From youth to Age**

There are three trying periods in a woman's life when the girl matures to womanhood, when a woman gives birth to her first child, and when she reaches middle age. At these times Lydia E. Pinkham's Vegetable Compound helps to restore normal health and vigor.

**INDIA PINKHAM'S VEGETABLE COMPOUND**

For Sprains—Use Minard's Liniment.

## May Leave Lonely Island

But Proposition Not Favorably Received By Inhabitants Of St. Kilda

One of the most romantic and the loneliest places in Britain may soon be left to the sea-birds. This is St. Kilda, the little group of islands in the Atlantic, whose population has now dropped to thirty-eight. At the beginning of this century it was seventy-seven, and in 1851 it was 110. It has now been proposed that the island should be evacuated, and homes found for the inhabitants on the mainland. There are some hundreds of sheep on the island, but these are kept for their wool, and only used for food if the supplies run short. Sea-birds' eggs and young sea-birds are the principal articles of diet, with potatoes when the crop is good—which isn't always the case. The life of the islands is thus a hard one, and the fare is apt to grow monotonous. But the St. Kildians are attached to their homes and don't want to leave them. The population, if now very small, was smaller still 200 years ago, when a terrible smallpox epidemic, the numbers of the islanders were reduced to thirty.

## GOOD IN EVERY WAY

Baby's Own Tablets Banish Babyhood and Childhood

Aliments

A medicine that all mothers praise—one good in every way—will quickly banish the minor ills of babies and children. It is a medicine to keep in the medicine chest; it is a medicine to use in case of emergency. Such a medicine is Baby's Own Tablets—they are helpful at all times. They are a mild but thorough laxative which will clear the bowels and stomach, banish colic and simple fever; correct constipation and indigestion; relieve bile colic and diarrhoea; and make the cutting of teeth easy.

Tousands of mothers use no other medicine for their little ones. Among them, Dr. J. H. Brown, of New York, writes: "I have four children and whenever any of them are ill I always use Minard's Own Tablets and have found them to be the only way I would not be without the Tablets and would also advise every mother to have a box of the Baby in Health and Sickness."

Baby's Own Tablets are sold by medicine dealers or by mail. A 25 cent box from The Dr. Williams' Medicine Co., Brockville, Ont.

## Museum Of Antiques

Many Amusing Things Seen At Garden Fete In London.

I heard of an amusing side-show held at a garden fete recently, writes "Looker-On" in the London Daily Chronicle. It was called a Museum of Antiques, but the nature of the exhibits may be guessed from the following specimens: A gigantic skeleton, four feet long, was in the 90's held bound and shirt from paring that pins of 900; a length of braid, one edge of which appeared frayed, but a skirt about five yards in diameter was also shown with this brush-braid new round, apparently to sweep up the mud of the streets; a large bag of iron nails, up to the back with innumerable tiny hooks and eyes which, not being useless, had marked the canister with iron nails which had there were other sumptuous relics in favour with our mothers and grandmothers.

## Courtesy Of The Road

Majority Of Drivers Have To Suffer For Carelessness Of Selfish Ones

The majority of drivers are without doubt, safe and considerate; but unfortunately all road users are at the mercy of an ignorant and selfish minority, who seem to imagine that a display of recklessness will be mistaken for an exhibition of proficiency. The cult of the cheap car has not been attended by a corresponding cultivation of good manners. Until the quick-tempered, self-centred motorist learns that there is a code of courtesy which must be adhered to on the King's highway, the innocent will continue to suffer for the sins of the guilty.

## Says Farewell To Regiment

The evacuation by the second battalion of the Leinster Regiment, the first complete British unit to leave the Rhine, brought stirring farewells scenes. Practically the entire population turned out in the drenching downpour of rain to wish the soldiers godspeed.

In Bolivia all the useful minerals belong originally to the state.

## For Sprains—Use Minard's Liniment.

## BAKE YOUR OWN BREAD

**ROYAL YEAST CAKES**

**HOME-BAKED BREAD IS BEST OF ALL**

## Little Helps For This Week

"For, to, the winter is past, the rain is over and gone; the flowers appear on the earth, the time of the singing of birds is come."—Song of Solomon II, 12.

The year's at the spring; And day's at the morn; The hill-side's dew-paried; The lark's on the wing; The snail's on the thorn; God's in his heaven; All's right with the world.

—Robert Browning.

That is not an enviable nature that braves the inclemencies of winter, the blinding of heaven through the mazes of the year; that sees no glorious hungs out on earth and sky of an infinite love that is never forgetful, and never unkind; that pauses not with reverent spirit to ponder the lesson that is told in grass, and rain, and flower; and that feels no benediction in the bright air and palpitating sky. He may be just to the experimenter, industrious and virtuous; but he does not understand the meaning of Jesus in the fields of Galilee, pointing to the birds in the lilies, and telling of our Father's care.—Horatio N. Powers.

**Fertilizer Brings Returns**

Increase In Yield Of 11 Bushels To The Acre Is Reported

A piece of land on the Polaroid farm in Morden, close by the Canadian Pacific Railway station, was seeded this year with fertilizer by the experimental farm of the district. It yielded 41 bushels of wheat to the acre, as compared with a yield of 30 bushels in an adjoining lot, unfertilized. It is said that the fertilizer retains its value to the soil for three years.

Corra: "I wonder why he's a bachelor?"

Der: "Oh, he didn't have a car when he was young."

## Meteors Falling On Earth

Will Make Planet Heavier, Says Professor Of Observatory In South Africa

The earth is putting on weight, says Dr. Luyten, of Harvard Observatory, at Bloemfontein, South Africa. He said that the number of Meteors falling upon the earth were in the neighborhood of 30,000,000 a day. "No matter how small they are," he said, "the total weight of a crowd like that is going to count in the long run." He declared that the ultimate effect would be to slow down the rotation of the planet and lengthen the day. Since the change in the length of the day will not be more than one-thousandth of a second in a million years, there is plenty of time for geologists to think out some sort of remedial process.

**The Oil For The Farmer.**—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a journey for the doctor. It is not only good for the children when taken with colds and croup, and for the nature who suffer from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the house.

The best light enters a room through the upper third of the window, the U.S. Public Health Service reminds us.

Neon light signs are now popular in China to advertise restaurants, business houses, and newspapers.

**Good For Cattle**

Keep Minard's in your barn for distemper and colic. An ounce almost first aid for any stock.

**MINARD'S LINIMENT**

**KING OF PAIN**

**Actual Thickness**

**Ideal--Wherever alterations are required**

IN many a fine, old-fashioned farm house there are rooms much larger than people today consider necessary. This available space can be partitioned off into extra rooms with very little work and at surprisingly small cost by the use of Gyproc Fireproof Wallboard. And the Gyproc walls and ceilings of the new rooms will match the older walls—no matter how solid they are—for seasoned rigidity, good looks and permanence.

Gyproc is the perfect building material for all modern farm construction—for homes, barns, poultry houses, granaries and garages. It is a pure rock—cannot warp, shrink or burn. With the use of joint filler and tape its sections meet in a tight, flush joint that insures a flat, smooth surface and takes any decoration.

# WARNING

TO

## Motor Car Drivers

### CARRY Your Licenses

The Vehicles and Highway Traffic Act, 1924, Amendment Act 1929, requires that every person operating a motor vehicle shall secure an operator's or chauffeur's license and shall at all times when driving carry same. A penalty is provided for failure to produce such licenses when demanded by an officer.

It is necessary, owing to the number of motorists who persist in driving without licenses, that the police be instructed to require the production of these licenses from time to time.

This law has been passed in the interests of safe driving, and the production of a license is the only proof of the ownership of one.

**Carry your license at all times and avoid inconvenience and prosecution.**

Application cards may be obtained from any Alberta Police Officer, Clerks of the Court, dealers in motor vehicles, or from the postmaster in any town or village, and when completed should be forwarded to the Motor Vehicle Branch Office at either Calgary, Lethbridge or Medicine Hat, or to the Office of the Deputy Provincial Secretary at Edmonton.
